HAVE READY

CLEAN BRUSHES - Can't tell you how much this affects your skin overall and makeup application and will be super helpful to work with clean tools

HOW TO CLEAN BRUSHES STEP BY STEP

1. *Ensure you don't get anything below the brush hairs or wet the handle*
2. *Use Dawn dish soap and warm to hot water (it works!) I prefer hotter helps with getting the color out better*
3. *Wet brush and add soap, let it lather*
4. *Rinse*
